Statement on REACH

Scope: all plastic pots, trays and related products manufactured by Modiform.

Modiform is a producer of articles and a downstream user of polymers and additives under Regulation (EC) No 1907/2006 (REACH). We do not manufacture substances. All raw materials are purchased from suppliers within the EU/EEA, so the registration obligations rest with our suppliers.

Our assessment is based on the REACH declarations of our suppliers, received in 2026. On that basis, our products do not contain any substance on the Candidate List of Substances of Very High Concern (253 entries, latest update 4 February 2026) in a concentration above 0.1% (w/w). No communication obligation under Article 33 REACH and no SCIP notification therefore applies. Our products also comply with the applicable restrictions of Annex XVII.

We monitor updates of the Candidate List and will inform our customers without delay should the status of any product change.
