## SUSTAINABLE AND OPTIMAL WAY TO SHIP POTTED PLANTS

**Modiform's clampack is the solution to achieving sustainable and optimal shipping of potted plants.**

A clampack is a sturdy form of packaging that 'clamps' around the pot and has an opening at the top through which the plant sticks out. The clampack has a sealing system to ensure convenient, rapid packaging of plants. This means that multiple plants of different heights can be shipped in a single box.

The patented clampack is easy to secure in the shipping box thanks to a specially developed system. For each clampack, a die-cut drawing of the matching shipping box is available. This ensures that you can easily order a box – printed or unprinted – from your supplier. In this way, both the pot and plant are optimally protected during their

journey to your customer. No more loose soil in the box or damage found when unpacking!

An organic, fully biodegradable wax is applied to the clampack. This ensures that the clampack is waterproof and remains sturdy. All ecoExpert products are recyclable (Cyclos certified), biodegradable, and compostable.

**Wow your customers with this safe, sustainable, and user-friendly shipping solution!**

# ON THE ROAD

**Consumers are increasingly ordering potted plants online. Shipping potted plants to customers requires good packaging. With the product category 'online packaging', we are introducing sustainable and safe solutions to ship your plants. The product range consists of clampacks and in-box trays.**

These products are made from 100% recycled paper and cardboard from FSC-certified sources. They are made of the same raw materials as the cardboard boxes in which they are shipped. This ensures that online store orders can be shipped in a complete packaging concept made of cardboard. Additionally, customers can simply dispose of the cardboard box, the clampack, and in-box tray in the paper bin – everything is fully recyclable. This is a way for you to offer a 100% recyclable and plastic-free shipping solution!

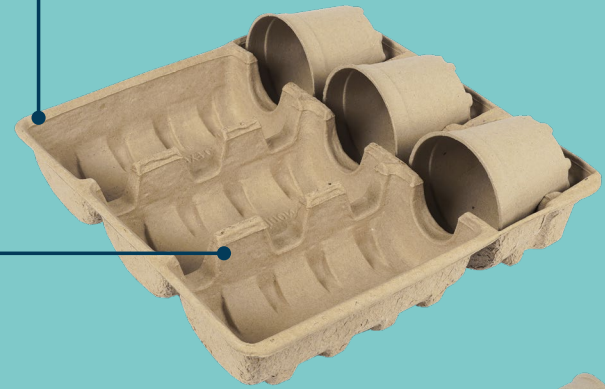

# IN-BOX TRAYS

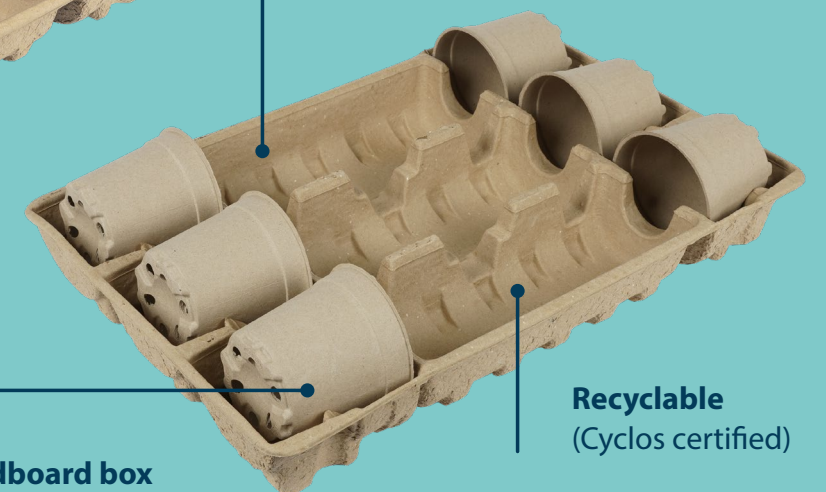

## THIS IS THE WAY TO SEND POTPLANTS EFFICIENTLY AND SUSTAINABLY!

This packaging solution enables you to horizontally place the plants in a tray. The in-box tray is suitable for plants of varying pot sizes, and multiple trays can be stacked above one another in the shipping box. Talk about smart design! We have made the die-cut drawing of the matching shipping box available for you, so that you can order it from your supplier.

**Three pot sizes possible in a single pack (10.5, 12, and 13 cm)**

**Made from 100% recycled paper and cardboard**

**Multiple in-box trays can be included in a single box**

**Easy to secure in the matching cardboard box**

**Recyclable (Cyclos certified)**

The product range will be expanded to include more variants. Modiform also develops new models on request.
